

Everything Naya Nazimabad

Comprehensive Product Specification & Phased Rollout Roadmap

Project Scope: Community Super-App & Portal	Target Township: Naya Nazimabad, Karachi	Execution Model: Grassroots to Formal
Architecture: Next.js 14 / TypeScript / Supabase	Checkout System: Native Cash on Delivery (COD)	Document Version: 1.0 (Master Release)

Executive Summary: "Everything Naya Nazimabad" is a unified digital ecosystem engineered specifically for the residents, local vendors, and home businesses of Naya Nazimabad. The platform bridges daily resident utility, hyper-local commerce, real estate matchmaking, social sports engines, and civic tracking. Launching as an agile, community-led platform without initial reliance on society administration, it drives resident stickiness before scaling to official gate and utility integrations.

1. Strategic Product Vision & Architecture

Naya Nazimabad is a rapidly expanding gated master-planned township with thousands of residential units across Blocks A through N, modern apartment enclaves (Globe Residency, Signature Tower, Peace Apartments), and premier sporting amenities (Gymkhana). However, residents currently navigate fragmented WhatsApp groups, unmoderated Facebook boards, and disjointed delivery options.

This product delivers a consolidated web platform built around three operational pillars:

- Hyper-Local Commerce with Native Checkout:** Full-featured digital storefronts for internal restaurants and home chefs with zero external app redirects, powered by an end-to-end Cash on Delivery (COD) workflow.
- Peer-to-Peer Community Utility:** Sector-filtered real estate listings, student gear exchanges, resident skill directories, and instant sports matchmaker feeds.
- Progressive Decentralization to Administrative Integration:** Building traction independently through grassroots adoption, establishing leverage to subsequently integrate gate management and maintenance billing with society administrators.

2. Master Feature Matrix

Domain	Core Capabilities	Rollout Phase	Target User
Food & Home Kitchens	Multi-vendor ordering, restaurant & home chef menus, native cart, block-wise address selection, COD checkout engine, vendor order management dashboard.	Phase 1 (MVP)	Residents & Vendors
Township Real Estate	Block-wise property catalog (120–400 sq. yd plots, bungalows, apartments), price analytics, direct owner/agent inquiry forms without middleman spam.	Phase 1 (MVP)	Buyers, Sellers, Agents
P2P Marketplace	Second-hand furniture, home appliances, gadgets, native cash-on-pickup/COD request workflows with resident verification tags.	Phase 1 (MVP)	All Residents
Daily Utility Hub		Phase 1 (MVP)	All Residents

Domain	Core Capabilities	Rollout Phase	Target User
	Jamia Masjid & block mosque prayer timetables, emergency contacts (Ali Habib Medical, security), local technician directory (electricians/plumbers).		
Community Events Engine	Interactive event creation, category filtering (sports, workshops, religious, kids), seat capacity trackers, and native 1-click RSVP management.	Phase 2	Organizers & Families
Activity & Player Finder	Real-time matchmaker bulletin for cricket, tennis/padel, football, jogging, and board games with instant player countdown and join request workflows.	Phase 2	Youth & Sports Enthusiasts
Kids Gear & Book Swap	Dedicated exchange for outgrown school uniforms, grade-specific textbooks, strollers, and toys (Sale vs. Free Swap).	Phase 2	Parents & School Families
Resident Skill Network	Verified resident service profiles (tutors, Quran teachers, tailors, fitness coaches, bakers) with in-home vs. student-visit booking requests.	Phase 2	Freelancers & Households
Commute & Carpooling	Route-sharing network for daily office/university commuters traveling to S.I.T.E, I.I. Chundrigar, Clifton, Gulshan, and Shahrah-e-Faisal.	Phase 3	Office Commuters
Water & Utility Trackers	Crowd-sourced private water tanker price tracking, line water schedules, K-Electric power outage status, and monsoon road condition warnings.	Phase 3	Household Managers
Domestic Help Directory	Community-reviewed and vouched database for domestic maids, drivers, cooks, and gardeners operating inside society gates.	Phase 3	Households
Society Gate & Operations	Single-use visitor QR passes, delivery driver PIN validation at main gates, automated maintenance ticketing, and Gymkhana membership dues.	Phase 4 (Partner)	Society Admin & Security

3. Detailed Phased Implementation Roadmap

Phase 1: The Commercial Core & Housing MVP (Month 1 / Days 1–30)

Primary Objective: Establish immediate transactional utility, generate repeatable daily active traffic through food ordering, and capture high-value property search intent.

1.1 Native Food & Home Kitchen Ordering

- Support dual vendor types: registered commercial eateries and residential home cooks (tiffins, bakers).
- Menu hierarchy: Categories (Daily Specials, Fast Food, Bakery, Desi), item variations, and add-on modifiers.
- Native cart and block-accurate delivery checkout (Block A–N, Street, Plot/Flat number).
- Strict Cash on Delivery (COD) engine: No third-party payment gateway friction or WhatsApp redirection.
- Vendor live order console: Audio order chime, one-click accept/reject, prep time selection, status updates.

1.2 Real Estate & Core Utility Hub

- Block-level property catalog: Plots (120, 160, 240, 400 sq. yd), bungalows, and apartment towers.
- Direct owner/agent lead forms, price-per-square-yard benchmark tags, and image galleries.
- General P2P marketplace for furniture, home electronics, and appliances.
- Daily prayer timetable widget customized for Jamia Masjid and sector masjids.
- Emergency speed-dial directory: Ali Habib Medical Center, society control room, and local ambulance services.

Phase 2: Community Engagement & Hyper-Local Economy (Month 2 / Days 31–60)

Primary Objective: Transform the platform from a transactional directory into an active social and professional neighborhood network.

2.1 Community Events & Activity Finder

- **Events Engine:** Neighborhood calendar for sporting tournaments, religious gatherings, women-only meetups, and kids' workshops.
- Native RSVP management with seat limits, attendee lists, and host broadcast announcements.
- **Player Matchmaker:** Real-time bulletin for box cricket, padel tennis, football, and jogging groups.
- Dynamic game countdowns, player requirement counters (e.g., "Need 2 players for 9 PM match"), and join approval flows.

2.2 Kids Gear Exchange & Skill Network

- **Pre-Loved Kids Exchange:** Outgrown school uniforms (filtered by local school), curriculum books, strollers, and toys.
- Dual mode: Paid Cash-on-Pickup or 100% Free Community Giveaway.
- **Resident Freelancer Directory:** Profiles for home tuitions, Quran teachers, tailors, fitness coaches, and designers.
- In-app inquiry booking requests with verified resident checkmarks.

Phase 3: Utility Tracking & Operational Expansion (Month 3 / Days 61–90)

Primary Objective: Address systemic pain points of suburban Karachi living: commute costs, utility reliability, and service credibility.

3.1 Commute & Infrastructure Trackers

- **Carpooling Bulletin:** Route listings for peak morning and evening commutes to S.I.T.E, I.I. Chundrigar, Clifton, and Gulshan.
- Seat reservation, cost contribution splitting, and departure time scheduling.
- **Water Tanker Tracker:** Crowd-sourced private tanker rates, delivery delays, and line water release updates.
- **Utility & Monsoon Monitor:** K-Electric load-shedding tracker, ISP downtime board, and Manghopir road flooding alerts.

3.2 Trust & Domestic Staff Registry

- **Vouched Domestic Help Directory:** Community-rated database for trusted maids, cooks, drivers, and gardeners.
- Reviews tagged by block residence to ensure safety and accountability.
- **Lost & Found Noticeboard:** Missing pets, discovered keys, unattended parcels, and safety hazard reports.
- Neighborhood safety alerts for open manholes and non-functional streetlights.

Phase 4: Official Township Integration (Long-Term / Post-Traction)

Primary Objective: Partner with Naya Nazimabad Management Company to integrate enterprise security and society ERP infrastructure.

4.1 Smart Gate Security & Society Operations

- **Visitor & Delivery Pass Engine:** Residents generate digital QR codes or 4-digit PINs for guests and courier riders, validated at security gate checkpoints.
- **Automated Maintenance Ticketing:** Photo/video ticket submission for streetlights, plumbing, and park upkeep with SLA escalation.
- **Official Dues & Facility Billing:** In-app society maintenance fee payments, Gymkhana sports complex slot reservations, and banquet bookings.

4. Technical Specification & Data Architecture

4.1 Modern Web Tech Stack

Frontend Framework	Next.js 14+ (App Router, Server Components, TypeScript) with Tailwind CSS, Shadcn UI, Lucide Icons.
Database & ORM	PostgreSQL hosted on Supabase, managed with Prisma ORM for type-safe schema definitions and migrations.
Authentication	Supabase Auth / NextAuth.js supporting Email/Password and SMS Phone OTP verification.
Checkout Engine	Native multi-vendor state machine, automated subtotal + delivery calculations, pure Cash on Delivery (COD).
Real-Time Layer	Supabase Realtime / WebSockets for instant vendor sound notifications, order tracking, and matchmaker updates.

4.2 Core Relational Data Schema

Entity	Key Attributes	Relationships
User	id, full_name, phone, email, role, block, street, house_no, is_verified	Orders, Listings, Events, RSVPs, Rides
Vendor	id, user_id, shop_name, vendor_type (Restaurant/HomeChef), block, is_open	Belongs to User; has many Products, Orders
Product	id, vendor_id, name, description, price, category, image_url, is_available	Belongs to Vendor; referenced in OrderItems
Order	id, customer_id, vendor_id, total_amount, payment_method ("COD"), status, address	Belongs to User & Vendor; has many OrderItems
Event	id, host_id, title, category, venue, block, start_time, end_time, capacity, fee	Belongs to User; has many EventRSVPs
ActivityPost	id, creator_id, activity_type, venue, start_time, players_needed, skill_level, status	Belongs to User; has many ActivityRequests
GearListing	id, user_id, title, category, school_name, grade_level, condition, price, is_swap	Belongs to User

5. Go-To-Market & Community Growth Playbook

Growth Phase	Execution Tactics	Key Milestones
Pre-Launch Seeding	Seed 40+ authentic real estate listings, onboard 8 local home chefs and 5 commercial eateries, populate mosque timings and emergency numbers.	Zero "empty state" pages on Day 1 launch.
Grassroots Community Activation	Distribute curated neighborhood guides into existing Naya Nazimabad WhatsApp/Facebook groups (e.g., "Full Block-by-Block Plot Price Sheet").	300+ registered resident profiles within first 2 weeks.
On-Ground Physical Visibility	Place QR code table standees and flyers at commercial zones (Gymkhana sports reception, Peace Apartments commercial outlets, local bakeries).	50+ daily active food & marketplace orders.
Administrative Partnership	Present user engagement metrics, active resident numbers, and order volumes to society management to secure official gate system integration.	Formal society onboarding & digital pass deployment.
